Electric scooter

30km Ultra-long Mileage /350W High-power Motor/

Battery BMS Intelligent Protection System

30 HIGH-QUALITY LITHIUM CELLS

36V 350WHIGH POWER BRUSHLESS MOTOR

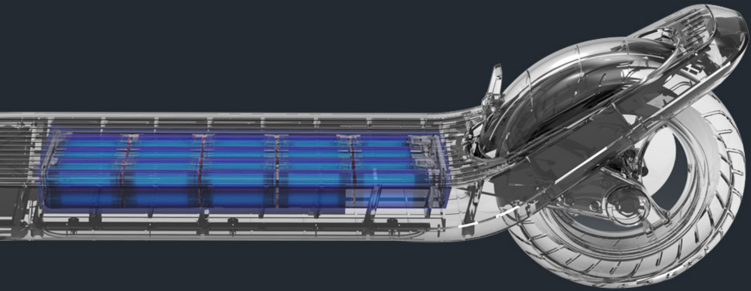
BMS INTELLIGENCE PROTECTION SYSTEM

FOLDING DESIGN

30pcs/40pcs/50pcs High quality power lithium battery

7.8Ah super capacity battery,which can meet 30 km long mileage.
BMS intelligent protection system provides all-round protection for batteries.The battery capacity can be in-

creased to make the battery life longer.



36V 350W high power brushless motor

could climb up 15% of the slope

Magnesium alloy lightweight frame

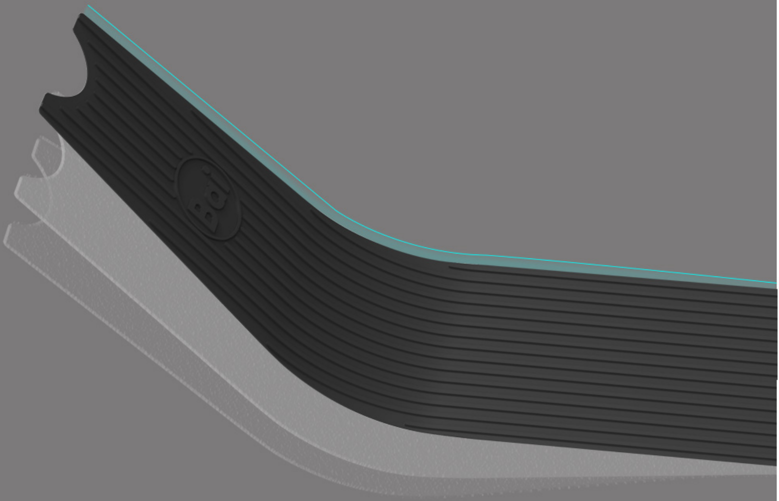
The weight of the whole vehicle is only 14.5KG,

which is easy to lift and effortlessly.

LED HD display

speed
mileage
battery

Silicone anti-skid pad can increase the comfort of trample, and will not slip while riding.



Widen, new upgrade, thicker tread pad

Bring a comfortable experience to every part of your cycling journey

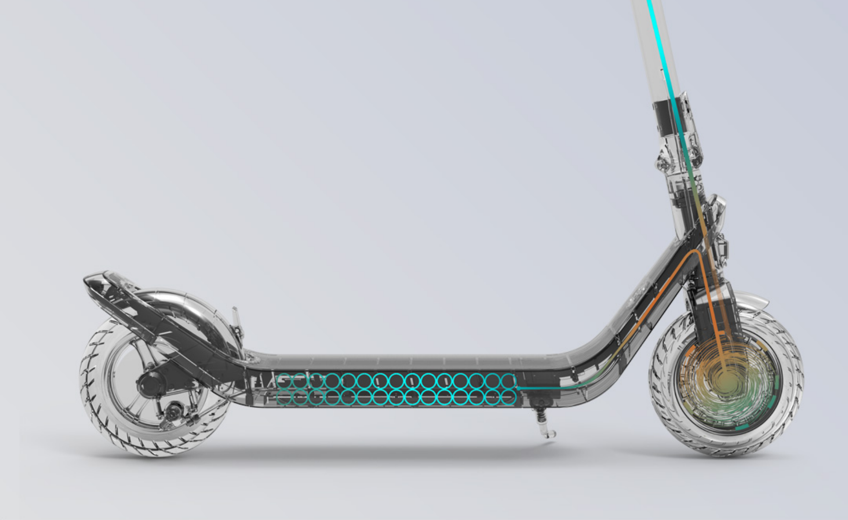
Highlight headlights

Large screen display, more peace of mind when traveling at night

Heart-warming energy recovery setting system

Have you ever seen one that can "power up" even while riding

Apply the energy recovery technology used in electric vehicles to this and let them drive
Energy recovery can be turned on automatically during the process. Convert part of the kinetic energy intoElectric energy storage further increases battery life.



Integrated vehicle design

High-strength magnesium alloy body
Lighter and stronger design

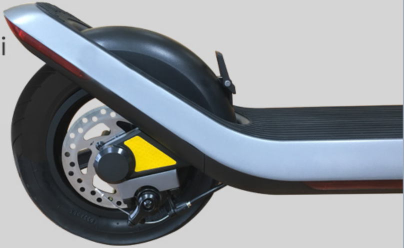
Body atmosphere light display design

Riding at night, illuminating the way home

We take every detail very carefully

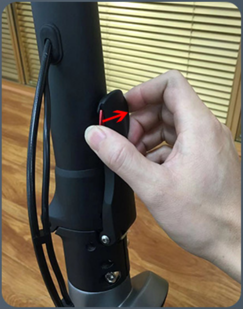
ual braking system: front mechanical drum brake + rear electronic brake

Braking reaction is fast up to 0.1s, fast and steady.

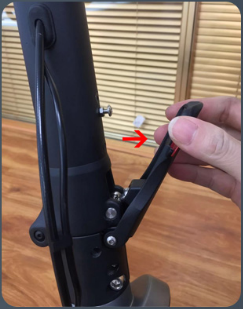


Three-step rapid folding

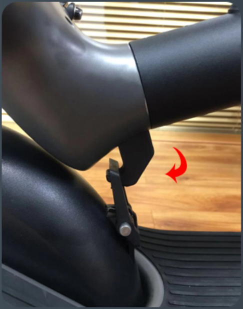
ress, apart and buckle



One click



A wave



One buckle

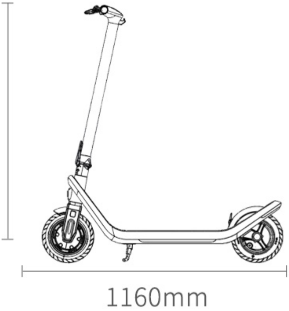
10-inch tires make the ride more smooth

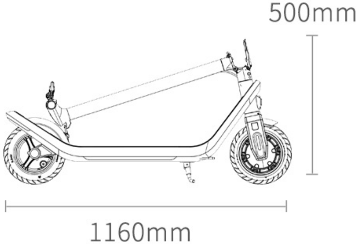
Safety tail warning light

Standard driving taillights, just turn on the lightsLight up to warn rear vehicles, liftDriving safety.

Product parameter

1200mm





The main technical parameters of the vehicle

Product number	A1
Dimensions	1160*520*1200MM
Folded size	1160*520*500MM
Package dimensions	1180*200*580MM
Gradeability	15%
Vehicle quality	14.5KG
Maximum design speed	25km/h
Electric power range	30km（Load 75kg）
Deadweight	≤100kg
