**Product Name:** WB Electrophoresis Tank

**Part Number :** BT-2, BV-2, SVE-2

### Product Description:

Double plate, used with electrophoresis apparatus. High transparency polycarbonate injection molding. It is suitable for gel-based electrophoretic separation experimental needs.

### Product Specification:

Product Number	Product Name	Dimensions(mm)	Dimension Weight (KG)
BT-2	Service bio-WB Electrophoresis Tank Transfer Laboratory Instrument	318*2.5*215	3.49
BV-2	WB Electrophoresis Tank (Vertical) Service Bio-Biomedical laboratory instrument	320*250*220	3.52
SVE-2	Service bio-Vertical Electrophoresis Tank for Western Blot Gel Running	185*108*125	0.62

### Product Feature:

1. High transparency polycarbonate injection molding tank, durable & easy observation.
2. Polycarbonate injection molding machine, real in-situ glue production function.
3. Good sealing, avoid buffer leakage and bubble infiltration of the glass plate.
4. The bottom surface of the gel is flush with the glass plate, avoid the formation of bubbles.
5. Simple structure, simple operation, meet the needs of different thickness of gel.
6. The integrated design of glue making, and electrophoresis ensures high safety.
7. The electrode head can be replaced for convenient maintenance.
