

## PXMP-L1008P

For PVC/PE/PS/PP bag welding

Control Mode	PLC,PC
Power	20KW
Voltage	380V
Pressure Mode	Pneumatic < 0.6MPa
Plate Dimension	1000*800mm
Sliding table	Automatic/manual
Netweight	2500Kg
Output	6cycle/min, depending on material
Machine dimension	7700*1200*2150mm
Remark	Customizable

### Machine Description:

1.Machines functions: automatic uncoiler , servo traction, bags forming(or automatic tube's feeding synchronous),automatic cutting, automatic waste materials' collection, final products automatic discharging etc.

2.Main configurations include PLC processor, high processor, high frequency/electric heating optional module, servo main motor, main-machine interface intelligent digital control, working of high automatic, fully functional, large expansion space, can be customized accordingly to customer's requirements
